

# A Word Or 2

**“Our own Black nation, the Republic of New Afrika, is Our only Real solution”**

## ***The Writing Is Still On The Wall***

When Blacks and whites in the United States unite for progress, it's just a matter of time before the white “liberals” settle their differences with white hardliners, abandon Black People, and get on with THEIR lives. Blacks are going to suffer like suckers again and find themselves more vulnerable than ever because they relied on their white “friends” for support instead of building their own independent power base. All of the time, resources and effort African-Americans put into the abuse and lynching of persons like George Floyd will be rendered null and void. White justice will give white terrorists a slap on the hand while Black law abiding persons will be punished more strenuously than ever. Police brutality was bad before, but it's gonna get worse because cops will be even more certain that they can act with impunity because ***Black protesters will not have proven themsemves capable of acting independently.***

## ***Capitalism Is A Cancer That Kills***

An engineer said many years ago that his job was to make sure a car part went bad after a certain period of time. He said it was easy to make a part that would last a long time, but that was not good for the economy. So, someone had to figure out how to make the part stop working sooner than it should have. The same is true of hundreds of other products people consume regularly. A light bulb could last for decades instead of months, but businessmen lose profits if light bulbs last a long time. What a death sentence for natural resources, but it's okay because it maintains the economy.

Employees work for 20 or 30 years, build up a pension fund and retire. The company they worked for doesn't want to pay their pensions so it creates a company that will take on the responsibility of making the pension payments, knowing that that company will go bankrupt in a matter of months. The retired persons stop receiving their pensions, the company they worked for denies responsibility and all is well.

***Capitalists, regardless of the color of their skin, are ready and willing to kill everything that stands between them and profit.***

***Be Black Smart  
Think New Afrikan***

## ***Studying Ourselves to Death***

There are millions of Blacks in the US of A who are very well informed about Black History and other subjects. They know a lot because they research extensively, read book after book after book, look at educational video after educational video after educational video, participate in discussion after discussion after discussion, etc. But knowing has never saved any one! Even worse, it is handicapping Black People because it has become an end in and of itself. We have studied Ourselves into a deeper do nothing mud hole than ever because somebody said “knowledge is power” and We fell for that crap.

The Blacks in Haiti in the 1700s and the Blacks in Cuba in the 1800s didn't know as much as Blacks know today and didn't have all of the degrees that Blacks have today, but they knew how to go into action. How revealing it is that, as smart as We are today, We can't go into action like uneducated slaves did 200 years ago. Toussaint L'Overture studied for a while and then he and his people went into action, leading Haiti to independence. Antonio Maceo studied for a while and then he and his people went into action, leading Cuba to independence. But the more precarious Black People get, the more We study. ***Could it be that studying excessively is Our way of placating the conscience of the coward in Us?***

## ***Something to Think About***

It was less than 60 years ago that Black Studies courses began entering the educational mainstream in the USA. I wonder what Black integrationist educators are going to do when white power tells them they have to teach Black Studies courses the way white people want them taught or not teach them at all?

Every Black who would not be a part of a slave rebellion back then is just as dead as those who did.

***Black People will get what they deserve, one way or the other; so go stand in front of the mirror and get ready to point your finger.***
