Black Nationalism is the only practical answer for Black People in the United States of America.

Let's Get Busy!

A WORD OR TWO **The Only Real Solution**

There is a document that receives quite a bit of lip service when one speaks of the history of the United States of America. That document is the Bill of Rights. It is important to understand that those men who wrote the United States Constitution did not care enough about the rights of the people to include a citizen's bill of rights. The men who wrote the US Constitution were only concerned about the rights of business, but they were forced to append a citizen's Bill of Rights to the law of the land. The second article of that Bill of Rights guarantees the people of the United States of America the right to bear arms and form a militia.

Why did people think the right to bear arms and form a militia was so crucial? What force was out there that they felt compelled to be able to defend themselves against? Were street robbers and malcontented individuals the object of this guarantee? No, not at all. People recognized that they needed the right to bear arms in order to protect themselves against the excesses of government whenever government went astray.

The fact that people are using arms to kill each other and rob each other on an individual scale is unfortunate, but it is not so unfortunate that they should sacrifice their right to bear arms, form militias and make themselves capable of defending themselves against their government. A government gone astray can do a lot more harm to people and society than a maladjusted individual. Imagine what position the Iraqi people would be in today if they had not had arms to defend themselves

against the US invaders; they would be just as helpless as the Palestinian people are. But because they had arms, they have put the United States in a position where it is unable to accomplish an unjust objective, and they have made people all over the world see that the United States is the number one terrorist threat in the whole world. Because the Iraqi people have arms, they have been able to thwart the schemes of the US government in a way the Palestinian people have been unable to do against Israel. The right to bear arms and form militias is crucial.

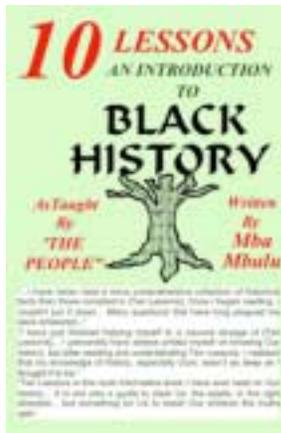

The world is a different place now than it was in the 1700s, but some chilling constants remain. One of those constants is that if you can not defend yourself, if you are not willing or unable to go to war to defend your rights and integrity, then you are fit to be dominated by any "tom, dick or harry" nation. This necessity is compounded when one considers the position of Black People in the United States. Not only do We have to be able to defend Ourselves against the US government, We also have to defend Ourselves against a multitude of white toms, dicks and harrys (and their girl friends).

In spite of the crime that proliferates in the Black communities, serious minded Blacks need to be arming themselves more than ever, and forming militias. The ability to defend Ourselves is part and parcel of the only real solution to Our problems; the establishment of an independent Black nation. Bearing arms and forming militias is a key to Us realizing that solution.
